

BitCashPay Review (BCP)

TGH SUMMARY

BitCashPay is a cryptocurrency platform that allows the user to be active in all types of crypto financial transactions without having to switch between platforms. BitCashPay can be best described as an “All in One” crypto platform that offers a crypto bank, lending, the BitCashPay Academy, a fiat gateway, an exchange, trading AI, a co-op pool, and decentralized lending via smart contracts. The aim of their project is to create a platform for cryptocurrency users that is clean, easy to use, and one that contains every step along the way, from novice crypto users to the advanced. With low to zero fees, high transaction speed, no KYC, and much more, BitCashPay aims to be the one stop location for all your cryptocurrency needs.

BitCashPay - <https://bitcashpay.net/>

The platform behind these goals is here! You can visit their site and get a sneak-peak for all the different options that BitCashPay is going to offer! Alongside the previous advantages, BCP will also be offering staking, yield farming, and discounts/rebates for the purchase of real life items. This means that not only will you be able to earn through using BCP’s staking/farming options, you can also get back money in day to day purchases!

Payment System - As an all in one platform, BCP aims to be one of the largest payment solutions there is, and as such are offering users the ability to purchase items in real life with BCP, like food, gasoline, mobile minutes, airfare, and more! Unlike most platforms where the token can really only be used to obtain more of itself, or another token, BCP gives a real use case where people can truly use their crypto as a payment system.

Dex/Lending - Additionally, in the spirit of decentralization, the exchange and the lending platform will be decentralized and run through smart contracts. This means that no single entity will own the exchanges or the lending protocols, and users can be rest assured that transactions are run through contracts instead of by a middleman.

Education - Another major part of the platform will be the BCP Crypto Academy! With cryptocurrency still being extremely new on a worldwide scale, education is of utmost importance in order for new users to join the process. The BCP Crypto Academy aims to educate everyone that wishes to take part, but will be specifically tailored for accountants and lawyers who wish to understand the cryptocurrency system and how it actually works. As cryptocurrency rises on the adoption curve, education still needs to continue and to grow, thankfully BCP is helping take the reins!

Token Utility and Economy

TOKEN SALE

VENTURE — 10,030,000 BCP Tokens — 20% on TGE, 80% over 8 weeks

STRATEGIC/PRESALE — 68,000,000 BCP Tokens — 20% on TGE, 80% over 8 weeks

PUBLIC/IDO/LAUNCHPAD — 170,000,000 BCP Tokens

TOKEN DISTRIBUTION

SALE— 269,280,000 BCP Tokens

TEAM - 170 Million BCP 12 months cliff + 2 years vesting

FOUNDATION (Unlocked – Non circulating) - 142,970,000 BCP Tokens,

Marketing, Strategic Partners, Advisors, Infrastructure, Development, and Exchanges

CORE PARTNERS— 42.5 Million BCP 6 months cliff + 2 years vesting

VALIDATION/STAKING/AD – 225,250,000 BCP Tokens 12 months vesting

Funds Allocation

Alongside the general tokenomics and those listed prior, there are additional use cases for the BCP token.

- First, BCP will be able to be used for staking at 12% APY or liquidity mining for 180% APY.
- Secondly, there will also be a BCP Co-op that will allow users to borrow money and paying back loans using BCP.
- Lastly, the burn. The BitCashPay Financial Technology Inc. will take 5% of its monthly income to buyback BCP tokens on the market and to burn them. This will both decrease the supply and create a positive feedback loop for the ecosystem. Win-win!

The Team

The team at BitCashPay are a highly experienced group of individuals with multiple different backgrounds and a sound mix of the different people needed to make the platform run smoothly. With the CEO being an established creator in the crypto space, alongside the plethora of experience to help, BitCashPay is aiming to truly make a one stop shop for crypto. As a team, BCP aims to build technology that will help all cryptocurrency users, and empower them to use a service that is beneficial for everyone.

BCP Roadmap

With all of their 2020 goals completed, 2021 looks to be another impressive ride for the BitCashPay network. Filing with the SEC and getting their app developed is first on the list, but so much more is still yet to come. Keep an eye out as developments get released, the team is running full steam ahead!
