

TGH SUMMARY

Falcon Project is an ecosystem that incorporates two entirely interchangeable blockchains. The current FNT token is an ERC-20 token and can be used by all investors and developers and the second chain which is currently being tested which will be the Falcon Blockchain, will allow for optional anonymous transactions. The purpose of implementing two different chains is so users have an option to choose between speed and convenience (ERC-20) or anonymity and privacy (Falcon Privacy Chain). This clever integration works using a free exchange of tokens to coins at a 1:1 ratio through a constantly available swap form on the Falcon official telegram-bot channel. Falcon prides themselves on this feature and claim that users will be able to exercise their right to completely confidential transactions using the Falcon coin when they need it. When privacy isn't needed then users can conveniently use the Falcon Token which will be available to trade on exchanges.

THE FALCON REWARD SYSTEM

The reward system for Falcon investors and token holders is unique and very advantageous. Investors who deposit at least 1,000,000 Falcon Tokens can exchange them for ERC-1155 Vouchers, which in turn will be frozen to gain HOLD awards which equate to 10% ROI every quarter, so it's possible to acquire 40% ROI over a year lock up period, which potentially a very profitable investment for anyone who locks up their tokens. One side note is that the number of vouchers are limited to 5,000,000,000 tokens, which is 33% of the total starting circulating supply of Falcon Tokens. the number of tokens frozen in vouchers will be –

increased using tokens in the freeze fund. In this case, the percentage of remuneration will decrease over time.

The Falcon team have just announced that vouchers for 500,000 FNT will soon be available and for those who can't afford even the cheapest vouchers, then you'll be glad to know that the team is working on yet another option which they will shortly provide information. But they left investors with a teaser **quote: "something interesting, affordable and profitable using the extended DeFi component of the FNT token"**

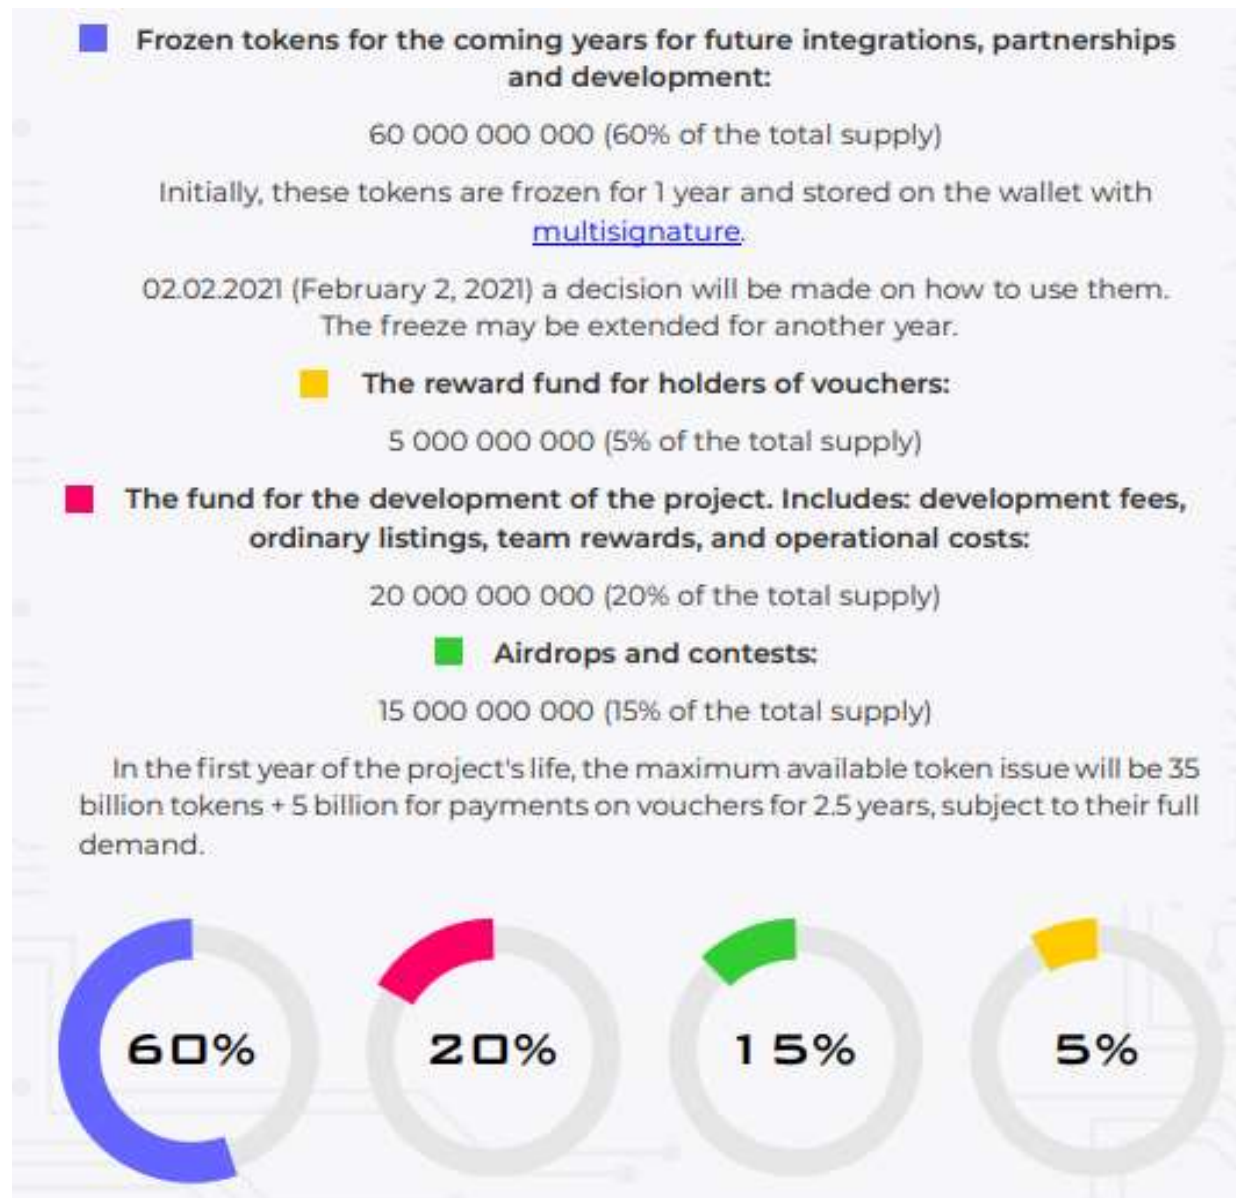

FNC BLOCKCHAIN

As stated previously the Falcon Block chain is being worked on and is already in the testing stages! Below are some key features that the FNC Chain will offer.

- Fast and convenient wallets
- Choice of anonymous and open transactions
- Adjustable ring signatures
- PoS mining
- Passive staking in pools

TOKEN AND UTILITY

TOKEN BURN

The Falcon team have made it clear that they value their community, and after numerous requests, have decided to start burning tokens from the frozen fund. But they have stated that this is not just a simple burn! They will burn TWICE the amount of dividends paid on vouchers. For example, if a payment of 400,000 FTN was made to a holder of 1 Million FNT, then 800,000 FNT will be burned from the frozen fund. In total, 10 Billion FNT tokens will be burned from the voucher system over the lifetime of the Falcon Project. The burning itself will be carried out quarterly after the main wave of payments, and they have also stated that they will communicate with the community as these events take place quote: **“so that they can quench their thirst for destruction and enjoy the burn as we also will. Do not miss these memorable events!”**

SHORT TERM CATALYSTS

- FNC blockchain is in test phase soon to be released
- Regular Token Burns to commence soon
- 500,000 FNT vouchers appeared
- New website created by top designer
- Marketing schedule to start for August/September

RESOURCES

Total Supply – 100,000,000,000

Circulating Supply - 7,722,282,001

SYNOPSIS

We feel at TGH that an interchangeable block chain with multiple purposes will appeal to more investors and users and in turn will bring high demand, we also note that the team have only been working on the project for just under a year and have already accomplished and delivered a lot of catalysts and with the block chain already in test phase, the Falcon team have proven they are more than capable of creating and maintaining a successful project, we are excited to follow the progress of Falcon project with the development of a new site from a top designer, Partnership with OKEx and marketing plans for August and September already drawn up, we feel like Falcon has a lot to offer new investors!
